

Whether you are a full time professional or a part time wood-working enthusiast, discover the unlimited possibilities of template routing with a CMT pattern bit. Pair up these double fluted bits with your choice of template to produce cabinet and furniture pieces, signs, toys and any other creative project. Carbide tipped to last longer, CMT pattern bits are equipped with the bearing above the cutter letting you work with the template on top of the wood. This gives you a clear view of what you are routing so you can work confidently and accurately.

Safety tips: Make sure your router is in top condition. The template must be securely fastened to the work piece. When choosing a bit, carefully consider the thickness of the template and all the implications of the cut. Opt for the shortest bit possible for the project you are working on.
